

Integrated Deicing Services Signs Multi-Year Contract with Nordic Regional Airlines

MANCHESTER, NEW HAMPSHIRE, September 13, 2017- In its first full year in Helsinki-Vantaa Airport (HEL), Integrated Deicing Services (IDS) has signed a multi-year contract with Norra (Nordic Regional Airlines Oy) beginning this coming winter.

IDS acquired the deicing operations from ADI in the middle of the 2016/17 deicing season and did not make any immediate changes in order to not interrupt current operations. Since that time, Jusa Olkinuora, a long time deicing expert in HEL, joined the IDS team to help run the HEL operations.

RosténJanne, Head of Ground Operations for Norrasaid, “We look forward in continuing the same type relationship with IDS as we had with ADI. IDS brings with them new and updated deicing procedures, which will not only improve take-off times, but also put less contaminants into the environment, which is good for everyone. Norra would like to lead the way with this type deicing in HEL.”

If you would like to visit the IDS Operations in HEL or need more information on IDS please contact Patrick Brown, Vice President Sales, Marketing and Customer Relation at +1 407 744 1574 or via email at patb@idsllc.aero.

Integrated Deicing Services is a member of the Inland Group of Companies.
