Inland Acquires Contego Systems De-icing Services, Expanding De-icing Services into the United States

October 30, 2014 (Truro, Nova Scotia, Canada): Inland Technologies Canada has announced that it has completed the acquisition of Contego Systems De-icing Services of New Jersey.

Inland Technologies is a full-service airport environmental compliance and ground support specialist providing services across North America. Contego Systems is a full-service de-icing service provider operating in the US Northeast.

“We are very excited about Contego Systems coming on board as a member of the Inland team,” said Roger Langille, President and CEO of Inland Technologies. “We see this as an augmentation of our current environmental and operations service programs and are excited by the new work possibilities this acquisition brings.”

“When we first started down the road of looking at a potential working partnership, one of the things that made Contego Systems stand out to us is their commitment to customer service, quality programming and safety,” adds Langille. “We share these values and feel it offers a strong foundation for working together to offer even more services in the future.”

Contego provides de-icing services at Washington, Regan Airport; Newark’s Liberty Airport; JFK Airport; Portland’s Jetport in Maine, and Westchester Airport, New York. All Contego staff is retained in their current roles.
