## **Inland Technologies Acquires AntiDeIcing ADI Oy**

**Truro, Nova Scotia, Canada:** Inland Technologies, through its subsidiary Integrated Deicing Services UK Ltd, today announce the acquisition of AntiDeIcing ADI Oy [ADI] of Helsinki, Finland. ADI is an aircraft de-icing operations specialist providing services at Helsinki-Vantaa Airport in Finland.

“This acquisition expands Inland’s European footprint,” said Roger Langille, President and CEO of the Inland Technologies. “Having ADI as part of our family of companies provides an exciting opportunity for us to move into the Scandinavian market where we can provide expanded service to our existing clients and build new partnerships.”

The acquisition, completed on Friday, December 9, is Inland’s first airport operation in Scandinavia. All operations with ADI’s existing clients will continue without interruption and Inland will be bringing new resources to the area to support additional growth and service development.

“We are working to ensure seamless operations for our clients during this transition,” said Matti Kaukonen, Business Manager of ADI. “We are looking forward to being part of the Inland Group of companies, and being in a growth position going forward.”

The Inland Group of companies provide a range of airport environmental compliance and ground support services. Specializations include aircraft de-icing application services, spent aircraft de-icing fluid management and wastewater programs, manufacturing of aircraft de-icing fluid, and ground handling services. The Inland Group of companies currently provide services at approximately 50 airports worldwide.
