QUANTEM AVIATION SERVICES WELCOMES SLAVA BUNESCU AS GENERAL MANAGER AT YYC

Truro, Nova Scotia – Roger Langille, President and CEO of the Inland Group of Companies (including Inland Technologies, IDS, and Quantem Aviation Services (Quantem)) is pleased to announce that Veaceslav (Slava) Bunescu has been assigned the role of General Manager for Quantem at Calgary International Airport (YYC).

Prior to joining Quantem, Bunescu held a variety of roles in airport services including his recent experience as Passenger and Ramp Manager for Airport Terminal Services at YYC, and prior to that, over 10 years as Station Manager for Austrian Airlines and Lufthansa German Airlines and at the Chisinau International Airport in Chisinau, Moldova. He holds a masters degree in mechanical engineering and spent time as an aircraft and helicopter engineer early in his career.

“This is an exciting time to be part of the aviation industry,” said Bunescu. “Quantem has a strong reputation for excellence in customer service and we are interested bringing this value to the carriers in Calgary. I’m proud to be a part of this expansion and look forward to helping meet the ground handling needs of our carrier clients.”

As General Manger, Bunescu will oversee all the Quantem operations at YYC, operating from the Quantem facility based at the airport.

“We are pleased that Slava Bunescu has joined our team,” said Roger Langille. “His experience and guidance will help our Quantem team continue to provide high-quality customer service to all our clients.”

About Quantem

Quantem provides a full range of aviation-related services, including ramp and passenger handling, domestic and international air cargo handling and warehouse services, security, mail sortation and ad-hoc passenger and freighter services.

About Inland Technologies

Inland Technologies is a full-service airport environmental compliance and ground support specialist. Core services include spent aircraft de-icing fluid management and wastewater management programs, and manufacturing of aircraft de-icing fluid and industrial glycol.
